

DownFlow Table Fume Collector

A Workbench with Built-in Fume Extraction.

RoboVent DownFlow Tables are a reliable, simple solution for fume and dust issues. The tables come in two different sizes, and are fitted with side shields that can fold out of the way to accommodate larger parts. In addition, a version with an integrated FumeArm is also available. There is no need for ductwork with the DownFlow tables, just connect the power, and a compressed air hose. RoboVent DownFlow tables pull dust, smoke and fumes down and away from the operator's breathing zone. The contaminants are filtered out of the air, and clean air is returned to the plant. The units feature vertically mounted filter cartridges, and a reverse pulse cleaning system that uses a compressed air blast to back-flush the filters and extend filter life.

- Minihelic filter pressure gauge
- Powerful, backward inclined blowers
- Heavy-duty welded construction, powder coat finish
- Quiet operation
- Built-in triple layer spark arresstance
- Vertical filter cartridges
- Built-in pulse cleaning (filter back-flush)
- One year filter life guarantee

Hot welding fumes are pulled down and away from the operator.

DownFlow Table : Optional Configurations

RoboVent
DownFlow Table
DFPT-800-1

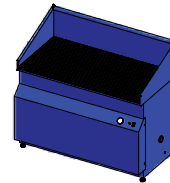

- 37"W x 37"D DownFlow Table
- 3/4 HP
- 1280 CFM
- 110V

Shown with
optional wheels

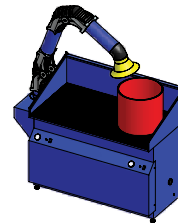

RoboVent
DownFlow Table
DFPT-1600-2

- 61"W x 37"D DownFlow Table
- 1-1/2 HP
- 2560 CFM
- 110V or 230/460V

RoboVent
DownFlow Table
DFPT-FR-1600-2
FR607

- 61"W x 37"D DownFlow Table
- 1-1/2 HP
- 2560 CFM
- 110V or 230/460V
- 6" diameter FumeArm

This model provides
enhanced fume capture
for tall weldments
