## RoboVent to Exhibit at Canadian Frac Sand Summit 2015

**Columbus, Ohio (April 15, 2015)** – RoboVent announced that they recently made the decision to become one of the newest Canadian Frac Sand Summit exhibitors for the 2015 season! Duncan Beaumont, RoboVent's Solution Director for the Canadian Region will be heading up the booth and will be supported by RoboVent's Senior Application Specialist, Mike Meyer; Regional VP of Sales, Gordon Diener, and Regional Application Specialist, Tim Main.

RoboVent will be highlighting their capabilities at the show; Including Vent Mapping Engineering, RoboVent Fusion3 series robust design coupled with leading technology makes it the perfect solution for Fracing operations whether they're on the jobsite with a mobile collector or at a storage facility. RoboVent's advancements have been proven to attract, motivate, and retain top employees in addition to increasing safety and overall well-being of employees.

To learn more about RoboVent and these exciting new offerings, visit them at the Canadian Frac Sand Summit in Calgary, Alberta - April 28/29.

## **About The Company**

During the past 25 years RoboVent has established itself as leader in the field of air filtration with highly efficient, reliable and cost-effective systems installed at major manufacturing operations across North America. Applications include welding, cutting and metalworking; dust collection and lubricant mist collection; and general ventilation. RoboVent is headquartered in Sterling Heights, Mich., with sales and service centers located throughout the United States and the world. At its core, RoboVent is an environmental problem solving company for process systems. Their expertise and resources in collecting, filtering and recycling contaminated air can be applied to almost any process in the manufacturing environment.
