RoboVent PRC-800 – Portable Room Cleaner

Improve air quality and help maintain safer, cleaner indoor environments

When equipped with a HEPA Filter, the PRC from RoboVent will remove 99.97% of particles larger than .3 microns. ASHRAE Standard 62.1 “Ventilation for Acceptable Indoor Air Quality” recommends meeting or exceeding the air change rates with a MERV13 filter. The PRC comes standard with a MERV15 filter to help enhance your existing ventilation system with better air filtration and can be upgraded to HEPA level filtration for additional peace of mind. This simple unit can be wheeled around to give any space better indoor air quality keeping customers, employees and patrons safer. Just plug it in to start breathing cleaner air to help prevent the spread of COVID-19 and other harmful viruses and bacteria
